Accidental Death Cover

Why consider Accidental Death Cover?

The true risk of accidental death is often underestimated. The most significant causes of accidental death are those caused by road accident, poisoning, falling from bed or stairs, gunshot, stabbing, suffocation, blunt object strike and drowning.

Accidental Death Cover provides high levels of cover at low premiums to specifically cover these risks. This policy is considered as a valuable top up to existing life cover or as stand alone cover against the risks of accidental or violent death as is most prevalent for individuals 25 - 40 years old.
